The golden Kubernetes Tooling and helpers list		Short Description of the tool or helper	Comments	
Argo CD	https://argoproj.github.io/argo-cd/	Argo CD is a declarative, GitOps continuous delivery tool for Kubernetes.		
AWS Kubernetes	https://github.com/scholzj/terraform-aws-kubernetes	AWS Kubernetes is a Kubernetes cluster deployed using Kubeadm tool		
eksctl	https://github.com/weaveworks/eksctl	eksctl is a simple CLI tool for creating clusters on EKS		
inlets	https://github.com/inlets/inlets	Expose your local endpoints to the Internet		
jetstack cert-manager	https://github.com/jetstack/cert-manager	cert-manager is a Kubernetes add-on to automate the management and issuance of TLS certificates		
k3s	https://k3s.io/	Lightweight Kubernetes		
k3d	https://github.com/rancher/k3d	k3d is a very nice deplyoment tool to run k3s in docker		
k3sup □ (said 'ketchup')	https://github.com/alexellis/k3sup	k3sup is a light-weight utility to get from zero to KUBECONFIG with k3s on any local or remote VM		
k3s on vagrant	http://devnetstack.com/kubernetes-the-easy-way-with-k3s/	Kubernetes the Easy Way With k3s!		
k9s	https://github.com/derailed/k9s	K9s - Kubernetes CLI To Manage Your Clusters In Style!		
kasten	https://kasten.io/	Application Backup and Recovery for Kubernetes		
kns	https://github.com/blendle/kns	kns - quick Kubernetes Namespace Switcher		
KOPS	https://github.com/kubernetes/kops	kops - Kubernetes Operations		
kubectx	https://github.com/ahmetb/kubectx	Power tools for kubectl		
kubelogs	https://github.com/eduardobaitello/kubelogs	It is a bash script that uses your current kubectl context to interactively select namespaces and multiple pods to download logs from		
kube web view	https://codeberg.org/hjacobs/kube-web-view/	Kubernetes Web View allows to list and view all Kubernetes resources ...		
kubefwd	https://github.com/txn2/kubefwd	Kubernetes port forwarding for local development		
Kubernetes Ingress Linklist	https://gitlab.com/kj187/kubernetes-ingress-linklist	UI with a list of all available Kubernetes ingresses per namespace		
NextClipper	https://github.com/NexClipper/NexClipper	NexClipper is the container and container orchestration monitoring and performance management solution		
Octant	https://github.com/vmware/octant	A web-based, highly extensible platform for developers...		
OpenEBS	https://github.com/openebs/openebs	Open Source Cloud Native Storage		
Polaris	https://github.com/FairwindsOps/polaris	Fairwinds' Polaris keeps your clusters sailing smoothly.		
Rancher Server	https://github.com/rancher/rancher/tree/master/server	Hepls to create and manage clusters anywhere via GUI or API		
ROOK	https://rook.io/	Open Source Cloud Native Storage		
TK8	https://github.com/kubernauts/tk8	The Kubernauts TK8 cli which can do magic things		
MSB	https://www.msb.com	Learn k8s with Nigel Poulton on real infra		
StorageOS	https://storageos.com/	Cloud Native Storage (Open Core?)		
Velero	https://velero.io/	Kubernetes Backup and Restore		
Gardener	https://github.com/gardener/gardener	Kubernetes clusters as a service		
Kyma	https://kyma-project.io/	A flexible and easy way to connect and extend enterprise applications in a cloud-native world	SAP open source	
Kubeman	https://github.com/walmartlabs/kubeman/	Kubeman is a tool that aims to provide an easy way to view information in Kubernetes clusters and investigate issues related to Kubernetes and Istio.	Walmart open source	
Kubeone	https://github.com/kubermatic/kubeone	kubeone is a CLI tool and a Go library for installing, managing, and upgrading Kubernetes High-Available (HA) clusters. It can be used on any cloud provider, on-prem or bare-metal cluster.		
Kubernetes Resource Report	https://github.com/hjacobs/kube-resource-report/	Script to generate a HTML report of CPU/memory requests vs. usage		
Kubernetes Operational View	https://github.com/hjacobs/kube-ops-view	Provides a common operational picture for multiple Kubernetes clusters		
Open Policy Agent (OPA)	https://www.openpolicyagent.org/	Open Policy Agent (OPA) is a general-purpose policy engine with uses ranging from authorization and admission control to data filtering.		
Tyhhoon K8s	https://typhoon.psdn.io/	A minimal and free Kubernetes distribution, you'd love it!		
kubectl bindrole	https://github.com/Ladicle/kubectl-bindrole	Finding Kubernetes Roles bound to a specified ServiceAccount, Group or User.		
litmus	https://github.com/litmuschaos/litmus	Litmus is chaos engineering for workloads on Kubernetes		
kube2iam	https://github.com/jtblin/kube2iam	Provide IAM credentials to containers running inside a kubernetes cluster based on annotations.		
Okteto	https://github.com/okteto/okteto	Dev tool for Kubernetes live development		
kone	https://github.com/ibm/kone	Build and deploy Node.js application on Kubernetes		
tilt	https://tilt.dev/	Tilt for Kubernetes microservice dev. Automates `docker build && docker push && kubectl apply`.		
ksniff	https://github.com/eldadru/ksniff	A kubectl plugin that utilize tcpdump and Wireshark to start a remote capture on any pod in your Kubernetes cluster.		
multipass-k3s-rancher	https://github.com/arashkaffamanesh/multipass-k3s-rancher	Rancher k3s, Rancher Server and RKE on Multipass VMs on your local machine for DevOps lovers		
The Awesome kubectl plugins	https://github.com/ishantanu/awesome-kubectl-plugins	A curated list of awesome kubectl plugins inspired by the awesome list		
The kubernetes Icon Set	https://github.com/kubernetes/community/tree/master/icons#kubernetes-icons-set	A set of Kubernetes architecture diagrams icons for presentations		
Eunomia	https://github.com/KohlsTechnology/eunomia?utm_sq=g62h94r8ha	A GitOps Operator for Kubernetes		
kubectl-neat	https://github.com/itaysk/kubectl-neat	Clean up Kuberntes yaml and json output to make it readable		
kubecd	https://github.com/zedge/kubecd	Kubernetes Continuous Deployment Tool		
This sheet is maintained by Kubernauts and the Kommunity.				
If you'd like to suggest a tool or helper, please comment in a cell in the last row.
